# COMMERCIAL TABLES.

EXCHANGE.—Currency and Sterling Equivalents, from 1 cent to \$50,000 Provincial Currency, and from 1 penny to £10,000 Sterling, at the old Par of Exchange, and in a progressive series of one-quarter per cent, from 5 to 14½ per cent premium.

STOCKS.—Stocks purchased at given premiums or discounts, and their dividends reduced to the real per centage they return on capital invested.

DEBENTURES.—Present worth of Debentures bearing 6, 7, or 8 per cent interest, and redeemable at periods varying from 1 to 20 years.

INTEREST.—Interest at 6, 7, and 8 per cent, from 1 day to 50; 52, 60, 63, 70, 80, 90, 93, 100, 200, and 300 days; also, for 1 to 12 months, on sums from \$1 to \$1,000.

COMPOUND INTEREST,—At 5, 6, 7, and 8 per cent, on \$1, from 1 to 20 years. COMMISSION, or Brekerage,—On \$1 to \$100,000, from \(\frac{1}{2}\) to 5 per cent.

### OFFICE OF THE BOARD OF TRADE, Quebec, 4th May, 1860.

Sir,

I have had the honor to receive and lay before the Council, your letter of the 25th ultimo, enclosing manuscripts of a work on "Exchange, and other Commercial Tables," which you are about to publish under the patronage of the Honorable the Minister of Finance.

In compliance with your request, the work has been examined; and having met with approval, I am to intimate to you the desire of the Council to subscribe for two copies.

I have the honor to be,

Sir,

Your most obedient Servant, A. FRASER,

Secretary.

To F. H. Andrews, junior, Esq. Quebec.

#### PREFACE.

The compilation of the following Exchange Tables has been undertaken to obviate the necessity of separate Tables for converting Currency into Sterling, and *vice versa*. The advantage and convenience of these Tables require no comment.

I have, on EACH OPENING, given ONE COMPLETE Rate of Exchange, both Currency and Sterling Equivalents, and considerably more matter than has hitherto been published. The Currency, it will be observed, is always given in "antique," or heavy figures, and the Sterling in light figures, this contrast facilitates a speedy reference to the column, either Currency or Sterling, and to the amount required.

My Stock Tables will be found of utility in shewing the per centage a Capitalist receives on investment in Stocks, purchased at from 30 per cent. discount to 30 per cent. premium, and yielding dividends varying from 2 to 12 per cent. per annum,—e.g. on reference to the table of 18 per cent. premium, it will be seen that Stocks purchased at that rate, and producing an annual dividend of 8 per cent., return  $6\frac{77}{100}$  per cent. on Cash invested.—The Table I have calculated for ascertaining the present worth, or Cash value, of Debentures paying 6, 7, or 8 per cent. interest, and having from 1 to 20 years to run, will, I feel confident, supply a want heretofore felt both by buyers and sellers. I have also given Compound Interest Tables, from 1 to 20 years, at 5, 6, 7, and 8 per cent. Tables of Commission or Brokerage, at  $\frac{1}{4}$  to 5 per cent. on any sum from \$1 to \$100,000; and, Tables of Charges upon Timber, Deals, and Staves.

In conclusion, I would remark, that being fully aware of the extreme importance of accuracy in a work of this kind, I have taken every means to ensure correctness both of calculation and typography.

FERDINAND H. ANDREWS, JUN'R.

Quebec, May, 1860.

The amount on any number of Standard, less than 100, is obtained by observing the amount on a similar number of hundreds, and using the dollars of such amount as cents, and the cents as the decimal parts of a cent; e.g. the amount on 6400 std. Bright is \$92.80, and on 64 std. is \$0.92.8.

#### REMARKS.

DEALS.—1 St. Petersburg Standard hundred is equal to  $3\frac{15}{40}$  loads of Timber.

STAVES.-1 Mille Standard, 1,200 pieces, is equal to 16 loads of Timber.

Do. —1 Mille West India, 1,200 pieces is equal to 51 loads of Timber.

LATHWOOD.—1 Fathom of 4 feet long, 6 x 6, is equal to 3 loads.

These articles should pay two thirds of the rates in the Table, when shipped as broken stowage, but the common, though unjust practice, in open charters, is to apportion the rates for broken stowage, as follows, viz.:

DEALS.—A Hundred St. Petersburg Standard, at twice the rate charged for Timber per load.

STAVES,-A Mille Standard, at six times the rate charged for Timber per load.

Do. -A Mille West India, at twice the rate charged for Timber per load.

LATHWOOD.—A Fathom of Lathwood, at the same rate as charged for Timber per load.

As the Ship loses freight on Deals and Staves, owing to the variation in the sizes and the loss in stowing so many pieces, besides the loss arising from the greater thickness of the Deals and Staves than they carry in the specifications (a 8 inch Deal measuring, on an average, 8j inches, while Staves have still greater inequalities,) it is evident that these articles are more disadvantageous to the carrier, even at the rates given in the Table, than is Timber at its rate. The practice is, therefore, in a twofold degree unjust and ought to be amended.

DRALS.—When bright, usually pmy 3s. to 10s. per hundred less than their proportionate rate, as struck in the foregoing Table, in consequence of the convenience and dispatch afforded by them as a Ship's cargo, and to cover the expense of lighterage, to which, by the custom of the Port, the shipper is subject, in delivering them on board of the Ship,—the allowance is, of course, not made as respects floated Deals, shipped in Moulinettes.

WHEAT, &c., &c.—Every description of Grain pays higher rates of freight than other goods n proportion wing to the expense to which the Ship is put for lining, &c., &c., to receive it, and for the risk attending so perishable a cargo. An ample allowance is therefore made in striking the above rates, but the Author is far from agreeing to the justice of the scale adopted in New York in this respect, where Wheat pays almost double the rate charged for Flour.

FLOUR.—In Barrels, like bright Deals, is generally taken somewhat under its proportionate rate, owing to the small expense attending its loading as a Ship's cargo.

Mille.

Table shewing the relative value of Timber, free on board, at Quebec, or delivered in Liverpool or other Port of discharge, in Sterling, as compared with the value in Shipping order here, in Currency.

By this Table is shown at one view the price which the Merchant can afford to pay, in Currency, for Timber, to fill a contract at any rate in Sterling money, free on board at Quebec, from 3d, to 15d. sterling per foot,

The column to the left is the selling price, free on board, here. On a line with which will be found, under its proper head, the rate at which the Merchant must buy the timber in shipping order;—thus 4id. sterling being the contract selling price for White Pine, it must be bought at 4,70 d. or say 8 cents; or say that 8 d., free on board, is the selling price for Elm, the price to be paid to cover cost, commission, and shipping charges is  $9_{100}^{48}$ d., or say 15 cents and 8 mills, currency.

By means of the column for Freight, a shipper of timber can see the total cost deliverable in Europe, including freight and all charges, except insurance. Say that White Pine in shipping order costs 5½d. or 9 3 cents currency, and the current rate of freight is 37s. 6d. sterling per load, opposite to 5 100 d. (the nearest amount to 5 d. in the column for White Pine,) will be found in the first column, to the left, 51d. sterling, and opposite to 87s. 6d. in the Freight column will be found 9d. sterling: making together 141d. sterling, or the cost of the timber delivered in Europe, free of all charges, except insurance.
